NVR Hard Disc

Hard Disc

STXXXXXXVXXXX

These HDDs are optimised for use in video analytics and imaging applications. Designed with advanced features, they are suitable for use with AI NVRs, servers and appliances with AI analytics and deep learning capabilities.

They support up to 64 HD cameras and 32 additional AI streams while offering capacities up to 20 TB delivering zero dropped frames. They have enterprise-class workload rates at 550 TB/yr for high reliability.

Leverage up to 8 TB for 24x7 workloads they are faster, more efficient, quieter drives designed for DVR and NVR systems.

When integrated into our NVR systems, these drives provide overall system reliability increases due to their System Health Management (SHM). In addition, the drives offer an optional robust three-year Rescue Data Recovery Services plan.

Features

- Available from 1TB to 20TB capacity
- ImagePerfect™ firmware is designed to ensure seamless video footage capture in 24x7 surveillance workloads that record video from 64 HD cameras.
- SkyHawk Health Management actively helps protect your surveillance storage by focusing on prevention, intervention, and recovery options.
- RapidRebuild™ provides 3x faster volume rebuilds over traditional RAID rebuilds.
- Unparalleled data protection with included 3-year Rescue Data Recovery Services plan, helping protect important video data with Seagate's in-house data recovery services
- RV sensors built in allow drives to maintain performance in multi-bay systems, giving you the flexibility to scale your systems when more storage is needed.
- ATA streaming support enables recordings from up to 64 HD cameras for smooth, uninterrupted footage.
- 1M hours MTBF, 3-year limited warranty represents an improved total cost of ownership (TCO) with reduced maintenance costs.
- Lower power consumption means a reduction in heat emissions, which improves reliability in surveillance solutions.
- Tarnish-resistant components help protect drives from environmental elements, increasing field reliability.
